Task 1 Write-up: Create a Digital Literacy Awareness Infographic

For this task, I used Canva to design a one-page visual resource titled "Level Up Your Digital Literacy". I chose this tool because its professional templates and drag-and-drop interface allowed me to focus on information hierarchy and clarity, ensuring the resource is engaging for my batchmates.

The design covers three essential topics: a definition of digital literacy as a critical mindset, a checklist for "Safe Internet Habits" including the SIFT method and Two-Factor Authentication (2FA), and a guide to "Email Etiquette" focusing on professional subject lines and greetings. My goal was to transform complex digital safety concepts into "snackable" bullet points that a student can understand at a glance.

One thing I found particularly interesting during the design process was the challenge of information density. I initially had too much text, which made the infographic feel cluttered. I learned that effective digital communication relies on using icons and bold headers to guide the reader's eye, forcing me to simplify my message without losing the core value of the information.
